

Disaster Remediation

When a disaster strikes, the demand for immediate clean up follows, whether it is fire, smoke, water, or mould damage as traditional cleaning methods are time consuming and tedious, not to mention ineffective for complete removal.

- Dry ice cleaning is up to three times faster than traditional methods.
- It provides a more thorough clean, even in the tightest of areas.
- In addition, dry ice cleaning achieves 99% mould spore removal from wood, plastered walls, brick walls and most of the time even on fabric!

Applications

- Fire and smoke restoration
- Mould remediation
- Odour elimination
- Water damage.

Key benefits

- Reduced cleaning time
- Reduced labour
- No secondary waste
- Chemical free
- 99% mould spore removal
- Removes odour from fire damage.
