

POLAR DRY ICE CLEANING LIMITED – TERMS & CONDITIONS FOR SHOT BLASTING

Welcome to Polar Dry Ice Cleaning Limited! We're dedicated to delivering the highest quality service to our clients. Before you utilise our services, it's essential to carefully review the following terms and conditions. By utilising our services, you agree to abide by these terms and conditions.

Shot blasting, using a range of blasting media:

Shot blasting using a range of different blasting medias on a wide range of surfaces demands a customised cleaning process. The approach we adopt depends on the age and type of the material to be cleaned and the extent of material that needs to be removed from its surface.

It's important to note that the final appearance and colour of completed surfaces are uncertain until the process reveals the surface beneath. Each surface is unique due to type of material, and the outcome may vary; therefore, we cannot be held liable for any deviations from our clients' expectations.

There are also circumstances that we may find that some materials are found to be still severely damaged following blasting. If this is found our team will consult client for direction.

Shot blasting may result in further damage to the surfaces, and we bear no responsibility for the final condition in such cases.

We do not assume responsibility for any loose or flaking surfaces around the blasting site, and we do not include any allowances for repairs or decorations in our estimate.

While we strive to provide accurate estimates, we cannot anticipate unforeseen challenges that take longer than expected.

If any issues arise during the project, our team will promptly notify the client and office for further guidance. Such challenges may lead to increased medium consumption, which we will also communicate to the client. This will be at an additional cost which will be discussed prior with the client.

Dust and Dirt:

We kindly request clients, where applicable, to remove all furniture/loose items from the working areas before we commence our services.

Our work involves using high volumes of compressed air, which cannot be entirely contained. During the blasting process, there will be the generation of dust particles and blasting media.

To mitigate dust generation, we employ preventive measures, including localised protection and extract ventilation systems within the working areas, if suitable.

Our team will perform a general cleanup and vacuuming of the immediate working area to remove the blasting medium. However, we cannot accept liability if debris settles in areas beyond our control and after we vacate site, and we are not responsible for deep cleaning services following our services.

Sign off:

On the completion of works, the team from Polar Dry Ice Cleaning Limited will require the client to inspect the completed works and to sign off as completed. This is your formal acceptance of paying our invoice in full upon completion without delay, in line with our standard terms and conditions that have been accepted at point of acceptance of quote. Payment of our invoice is not solely dependant on formal sign off.

We do however expect the client to inspect the works during the cleaning process and to raise any questions with the onsite team.

If you have any questions or concerns about these terms and conditions, please do not hesitate to contact us.

Thank you for choosing Polar Dry Ice Cleaning Limited.
